

# Smart Automation system for :

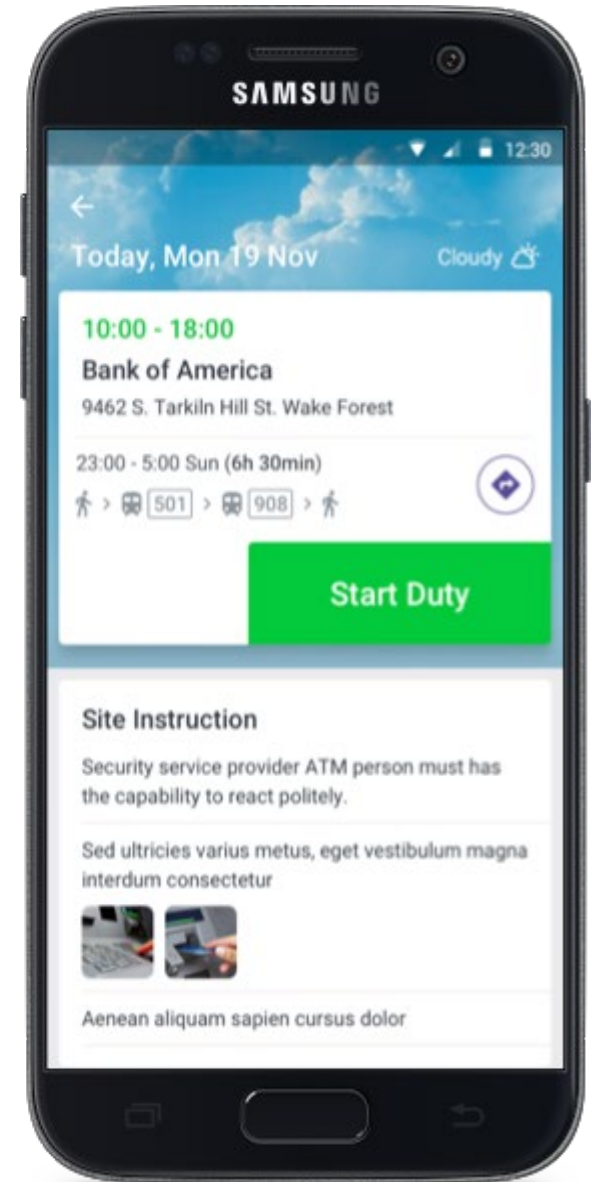

- Guard Supervision
- Schedule Management
- Report Management
- Business Management

# Guard Supervision

## 1. Geofence :

Guards can only “Start Duty” when they reach inside the geographical fence created by the manager

# Guard Supervision

## 2. Geofence Boundary:

Managers get notified when Guard leaves or re-enters the Site, ie. assigned geofence area

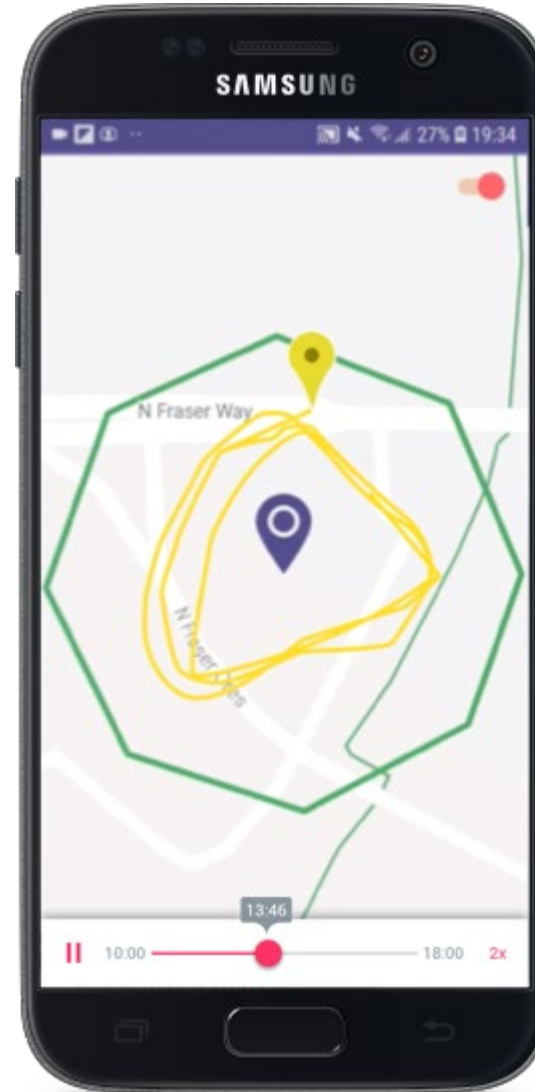

# Guard Supervision

---

## 3. Live & Past Tracks:

Managers can not only see Live Tracks but can also navigate through Past Tracks of the guards On Duty using a seek bar.

# Guard Supervision

## 4. Job Duty:

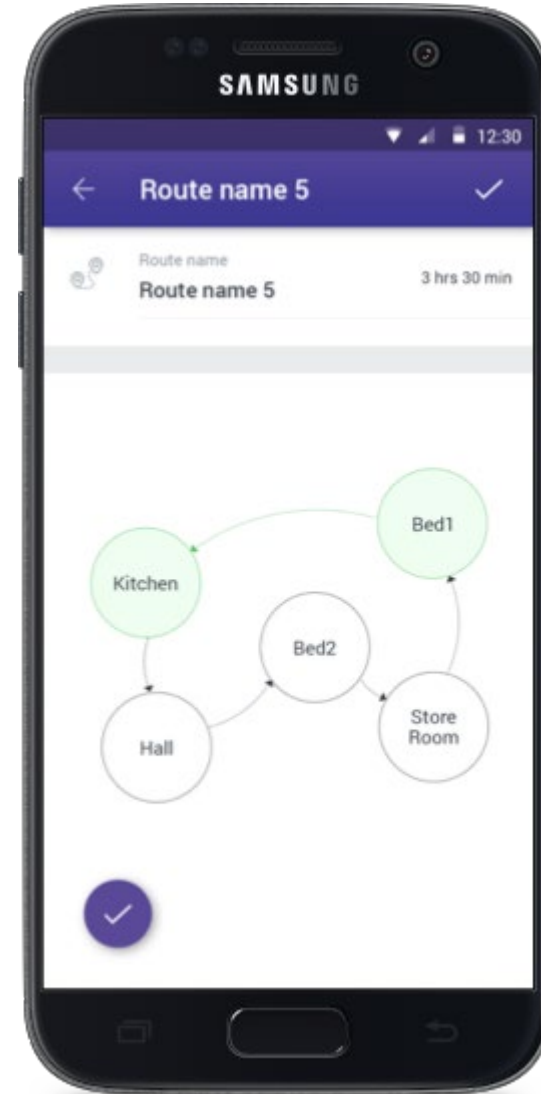

Managers can set up regular Check-Ins for guards & managers are notified if guards misses a Check-In. This makes sure that guards are Safe + Alert on site.

# Guard Supervision

## 5. Checkpoint Tours

Guards can perform NFC & QR Code checkpoint tours using their Mobile Phones. Managers get notified immediately of any missed or incomplete tours.

# Report Management

## 1. Online Reporting

Guard reports are directly stored on Cloud and can be sent to the client with no delays

# Other Great Features

---

- **Security Guard Licence Management**

*Managers and guards are notified 60 days before guard's licence expiration date.  
Guards with expired licences cannot be scheduled*

- **Guards Availabilities**

*Guard can add their availability and ask for leaves for easy scheduling*

- **Guard Rating System**

*Managers can record any guard activity and Rate guards in our system and that rating is displayed while Scheduling*

- **Live Report Analysis**

*We provide managers with Live Data in form of graphs and charts on the field to make better decision and improve security service*
